DIBACHEM
MASTERBATCH & ADDITIVES

Masterbatch that starts with your process

Masterbatch and additives for textiles, film and plastics

Dibachem at a glance

Based in Muscat, Oman, Dibachem supports masterbatch selection for textile and plastics applications.

The discussion starts with the resin, production process and finished-product requirements.

Oman

Color and additive masterbatch

DIBACHEM
MASTERBATCH & ADDITIVES

A clear technical starting point

Application first

Define the polymer, process and target appearance or function.

Relevant grade checks

Review carrier, dosage, processing and available documents.

A documented trial

Agree conditions and acceptance criteria before approval.

Clear commercial details

Confirm quantity, packaging, destination, payment and shipment.

Product range

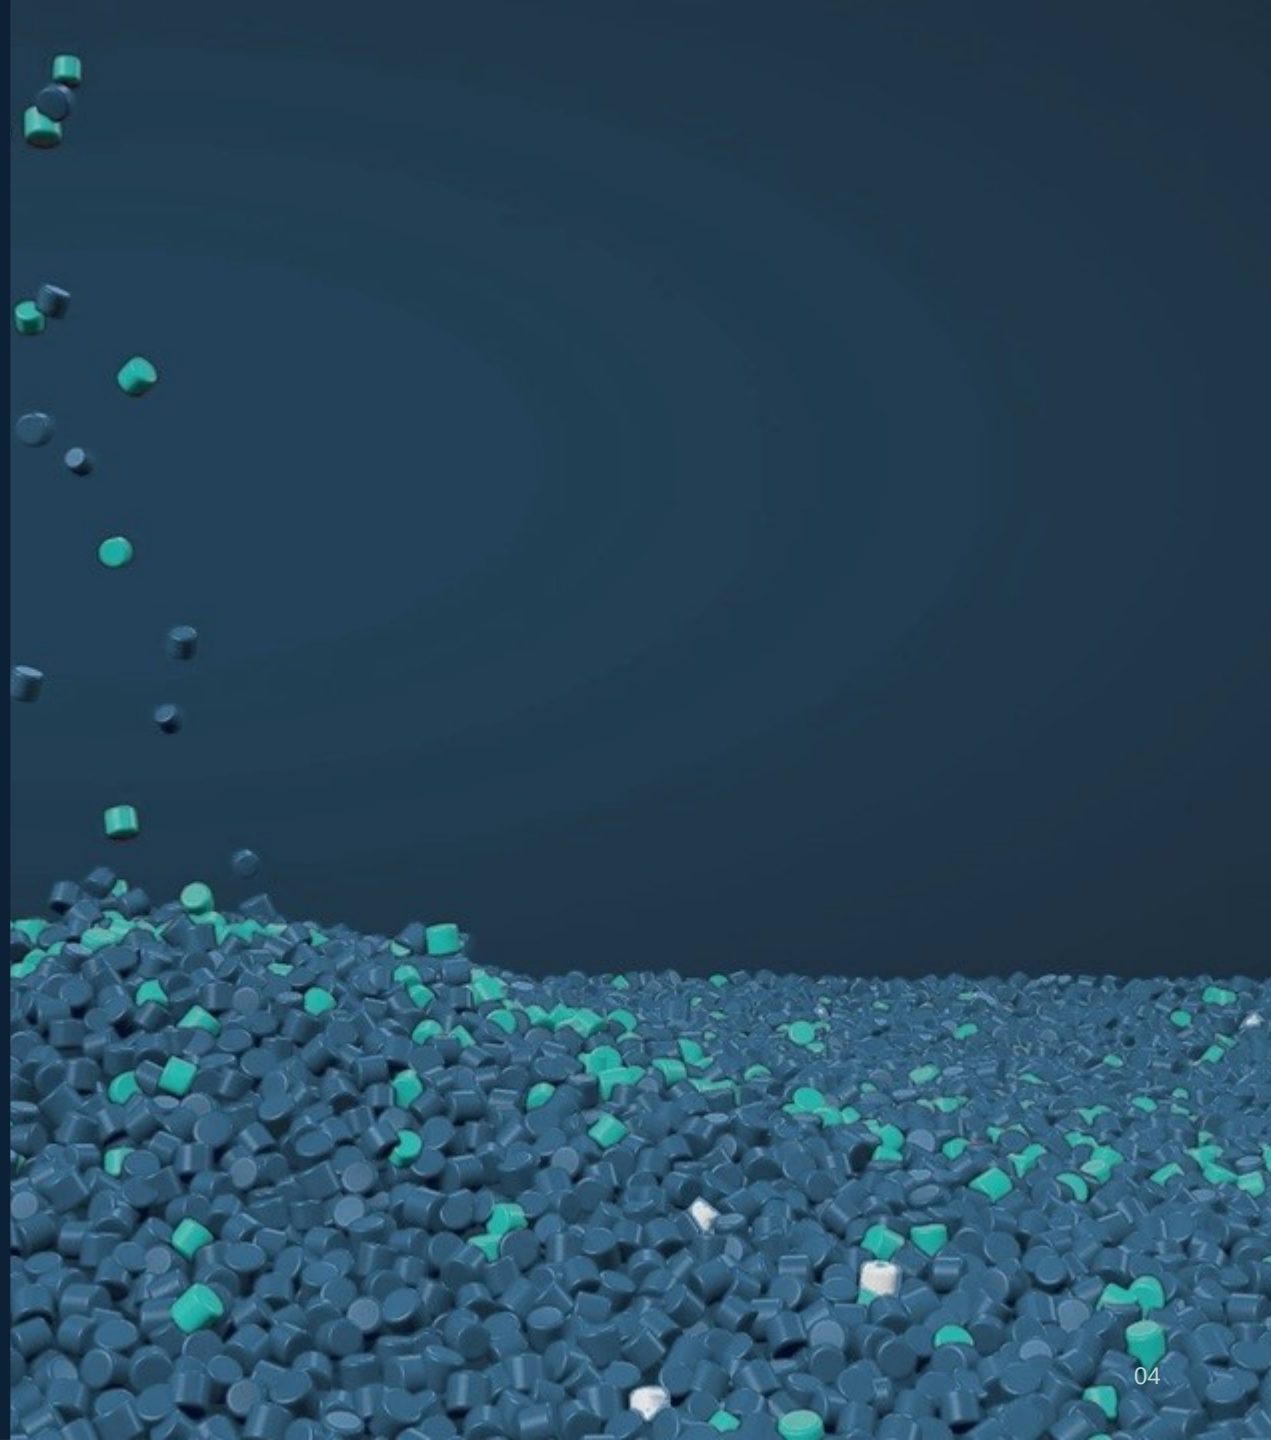

Color masterbatch
Color matching and appearance

White masterbatch
Whiteness and opacity

Black masterbatch
Blackness and dispersion

Calcium carbonate filler masterbatch
Mineral modification

Additive masterbatch
Processing and functional requirements

DIBACHEM
MASTERBATCH & ADDITIVES

Applications

Film & Plastics

Polymer film
Injection molding and PET preforms
Polymer pipes
Artificial grass and corrugated plastic

Fibers & Textiles

BCF and CF yarns
Spunbond nonwovens
POY and FDY yarns
Polyester staple fiber

Technical checks for the proposed grade

Color and appearance

Compare against the reference under agreed conditions.

Compatibility and processing

Review the base resin, carrier and production settings.

Dispersion and filtration

Select checks relevant to the fiber, film or molded part.

Documents and acceptance

Confirm the method, limits and grade-specific evidence.

DIBACHEM
MASTERBATCH & ADDITIVES

Confidence starts with a defined trial

Define what matters, how it will be checked and the acceptable limits.

Keep the resin, dosage, settings and reference samples recorded.

DIBACHEM
MASTERBATCH & ADDITIVES

A simple path from brief to order

01

Application brief

Resin, process and product requirements.

02

Grade and sample

Compatibility, documents and a proposed trial.

03

Trial and review

Recorded results against acceptance criteria.

04

Terms and order

Grade, quantity, destination and commercial details.

DIBACHEM
MASTERBATCH & ADDITIVES

Confirm the order details before shipment

Grade and documents

Confirm the exact grade and required technical or regulatory evidence.

Payment and shipping

Confirm the terms in the written quotation before committing.

Quantity and destination

Agree packaging, destination and truthful origin information.

Approval and records

Keep the approved specification and trial result with the order.

DIBACHEM
MASTERBATCH & ADDITIVES

Start with your production requirements

Polymer and production process
Target color or function
Product specification and trial checks
Approximate quantity and destination
